Abbreviations and explanations

Portfolio review

Risk posture [: The risk posture reflects the agreed mandate and indicates the level of market risk the portfolio is positioned to accept over time.]

Expected return [: Expected return is an indicative long-term outcome derived from a combination of historical experience, current positioning, and capital market assumptions.]

Volatility [: Volatility measures how widely returns may vary over time and should be read as an indicator of short-term fluctuation rather than a permanent loss expectation.]

Maximum drawdown [: Maximum drawdown describes the largest historical peak-to-trough decline observed over a given period and provides a useful stress reference for portfolio behaviour.]

Information ratio [: Information ratio compares excess return to active risk and helps assess whether benchmark-relative decisions were rewarded efficiently.]

Tracking error [: Tracking error measures the degree to which portfolio returns differ from benchmark returns across time.]

Value at risk [: Value at risk is an indicative downside estimate based on recent portfolio behaviour and should be treated as directional rather than predictive.]

Data sources [: This review draws on portfolio, performance, and risk figures from lotus-core, lotus-performance, lotus-risk.]

Review status [: Current review readiness is ready, with completeness assessed as complete and data quality assessed as quality_passed.]

Detailed positions

Market value [: Market value reflects the latest available valuation in USD as of 2026-04-23.]

Unrealized P/L [: Unrealized profit or loss compares current market value to the average cost basis of the position.]

YTD contribution [: Year-to-date contribution shows the estimated contribution of a position to portfolio return over the current reporting period.]

Category [: Category identifies the primary asset class or exposure bucket used for internal portfolio grouping and review.]

Weight [: Weight expresses the position size as a share of total portfolio market value.]

Position detail [: Position rows are presented in a compact statement format to improve readability where portfolios hold multiple instruments.]

Booking center [: Booking center for this relationship is Singapore.]

Advisor [: Relationship coverage is provided by advisor RM_SG_001.]

Review date [: All figures in this report are presented with an as-of date of 2026-04-23.]

Transaction list

Content [: The transaction list summarizes booking activity captured during From 01.01.2026 to 23.04.2026.]

Booking text [: Booking text identifies the transaction type, such as purchase, sale, coupon, or other income event.]

Number/Amount [: Number or amount reflects the principal cash movement or transaction amount recorded for the booking.]

Transaction price [: Transaction price reflects the execution price, net asset value, or internal valuation reference available for the booking.]

Gain/Loss [: Gain or loss shows the realized or transaction-related economic effect associated with the booking where available.]

Transaction value [: Transaction value presents the booked amount in reporting currency.]

Pending activity [: Recent activity may still be subject to settlement timing, pricing completion, or final booking confirmation.]

Currency basis [: Transactions are displayed in reporting currency USD unless otherwise noted in the booking description.]

Statement usage [: Transaction views are intended to support review, reconciliation discussion, and advisory follow-up.]
